

Vy Van Muoi

Full-Stack Web Developer

Ho Chi Minh City, Vietnam • domuoigghh@gmail.com • +84 868 166 353 • github.com/vanmuoi24

Professional Summary

Software Engineering student with practical experience delivering freelance web solutions and developing full-stack applications using React.js, Next.js, Spring Boot, and MySQL. Built and deployed real-world projects, including service booking platforms, IoT monitoring systems, and AI-powered CV screening applications. Seeking a Software Engineer Internship to contribute to impactful products while continuing to grow as a developer.

Freelance Experience

Website for Plumbing and Electrical Repair Services  Live Demo |  GitHub 09/2025 – Present

- Developed a service booking website using Next.js.
- Built SEO-friendly and responsive user interfaces for multiple devices.
- Implemented service pages, contact forms, and customer support features.
- Deployed and managed the website using hosting panel services.

IoT Monitoring Dashboard System  Frontend |  Backend 11/2025 – 01/2026

- Freelance project for developing the frontend and backend of a local IoT monitoring dashboard system.
- Built a real-time IoT dashboard using React.js to visualize sensor data with dynamic charts and live updates.
- Developed RESTful APIs using Java Spring Boot and MySQL to handle CRUD operations and sensor data management.
- Implemented JWT authentication, login/register features, and real-time data updates.

Personal Projects

Smart CV Filtering Website  Frontend |  Backend |  API 01/2026 – 04/2026

- Developed a smart CV filtering website using React.js for frontend and Java Spring Boot RESTful APIs for backend.
- Developed an AI-powered CV matching service using FastAPI, TF-IDF, and Cosine Similarity to rank candidates based on job descriptions.
- Implemented responsive user interfaces and optimized recruiter experience.

Medical Appointment Management Website  Frontend |  Backend 09/2024 – 02/2025

- Developed a medical appointment booking system using React.js, Node.js, Sequelize, and MySQL.
- Implemented user authentication, doctor schedule management, and patient record tracking.
- Optimized database queries to improve performance and reduce load times.

Skills

- **Programming Languages:** Java, JavaScript, TypeScript, SQL
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Spring Boot, Express.js, Node.js, REST APIs
- **Database:** MySQL, Sequelize ORM
- **Tools:** Git, GitHub, Postman, Linux, VPS, Docker (Basic)
- **Concepts:** OOP, MVC, RESTful APIs, Authentication, JWT, Responsive Design

Education

Saigon University 2022 - Present

Major: Software Engineering

Relevant Courses: Web Development, Database Systems, Software Development, Software Technology
